

Unified Sales Intelligence Platform — Reference Architecture

Source systems » secure ingestion » unified, governed data model » AI & analytics » executive dashboard

The Agency

Governance, Security & Compliance — by design, across every layer

- Entra ID (Azure AD) SSO
- Role & row-level security
- UAE data residency (Azure UAE)
- PDPL / DIFC / ADGM aware
- Encryption in transit & at rest
- Full audit trail & lineage
- Secrets vault, no creds in code
- Data minimization to AI

Built to scale

- Add a new source = add a connector, not a re-build
- Latency tuned per decision (real-time to daily)
- Sized for seasonal peaks
- One KPI definition reused everywhere (no conflicting numbers)
- Cloud-elastic compute & storage; pay for what you use

Data flow Source systems remain the system of record. We read from them (never write back), reconcile POS to finance, classify revenue by source, and serve a single governed truth to the AI and the dashboard.
